

PAIGE LECLAIR
Tampa, Florida 33613

Paige.leclair.business@outlook.com 727-744-0015 LinkedIn Portfolio

SUMMARY

Interdisciplinary Computer Science Engineering and Psychology graduate with hands-on experience building and maintaining technical systems in healthcare IT and research environments. Proficient in C#, Python, and C++, with experience across the software development lifecycle including implementation, debugging, testing, and version control in Agile team settings. Strong interest in system reliability, performance optimization, and developing scalable, maintainable applications.

EDUCATION

University of South Florida – Tampa, FL

August 2021 – May 2026

- Bachelor of Science in Computer Science Engineering
 - Bachelor of Arts in Psychology
-

PROFESSIONAL EXPERIENCE

HCA Lakeland Supply Chain

Technical Analyst Intern

January 2026 – May

- Diagnosed and resolved hardware, software, and network issues across enterprise desktop environments to maintain system uptime.
- Performed system installations, configuration, and troubleshooting to support operational reliability.
- Documented incidents and contributed to root cause analysis to improve recurring system issues.
- Supported infrastructure updates and system changes across multiple departments.

University of Alabama – National Science Foundation

Research Intern

May 2025 – July 2025

- Designed and developed a Unity (C#) simulation environment to evaluate perception systems under adversarial conditions.
- Integrated VR eye-tracking hardware to collect structured behavioral datasets.
- Implemented data capture and processing workflows to support model evaluation and system testing.
- Analyzed system behavior under manipulated inputs to identify reliability gaps and improvement opportunities.

theCoderSchool

Coding Instructor

June 2023 – November 2023

- Taught coding fundamentals through guided projects, reinforcing logical reasoning, debugging, and collaborative development skills.

CERTIFICATIONS

Google Data Analytics

November 2025

- Completed a nine-course program covering data cleaning, preparation, analysis, and visualization using spreadsheets, SQL, R, and Tableau.

Google Agile Project Management

April 2026

- Completed training in Agile and Scrum methodologies, covering principles, Scrum framework, ceremonies, and team coaching for effective project delivery

SKILLS

- Programming & Technologies: Python, C, C++, C#, SQL, R, COBOL, Lua, HTML, React, .NET
- Tools & Platforms: Git, GitHub, Slack, Jira, Unity, Figma, Tableau, Microsoft Office
- Data & Analysis: Data cleaning, evaluation, visualization (Tableau), behavioral data analysis

PROJECTS

Student Networking App

- Developed a console-based networking platform in COBOL supporting account creation, profile management, and persistent file storage.
- Designed structured data storage mechanisms to maintain session integrity across executions.
- Collaborated in an Agile team using Git/GitHub for version control and sprint-based development.

Interactive Stock Visualization Tool

- Built a modular C#/.NET application to process and filter time-series financial datasets.
- Implemented reusable data-processing pipelines to clean and normalize structured data inputs.
- Designed interactive visualization components to display trends and anomalies using object-oriented design principles.
